

A 4x4 grid with numbers 1-8 and paths of circles and lines. The grid is divided into four 2x2 quadrants by a thick black cross. The numbers are placed in the top-left, top-right, bottom-left, and bottom-right cells of each quadrant. The paths are formed by circles and lines connecting them. The paths are as follows:

- Top-Left Quadrant:** A path of 4 circles connected by lines, starting from the top-left cell and ending at the top-right cell. The path is: (1,1) -> (1,2) -> (2,1) -> (2,2).
- Top-Right Quadrant:** A path of 4 circles connected by lines, starting from the top-right cell and ending at the top-left cell. The path is: (1,3) -> (1,4) -> (2,3) -> (2,2).
- Bottom-Left Quadrant:** A path of 4 circles connected by lines, starting from the bottom-left cell and ending at the bottom-right cell. The path is: (3,1) -> (3,2) -> (4,1) -> (4,2).
- Bottom-Right Quadrant:** A path of 4 circles connected by lines, starting from the bottom-right cell and ending at the bottom-left cell. The path is: (3,3) -> (3,4) -> (4,3) -> (4,2).
