

The figure displays a 3x3 grid of scatter plots, each with a title (1-9) and a set of data points. The plots are arranged in a 3x3 grid, with the titles 1 through 9 in the top right corner of each plot. The data points are represented by small circles, some of which are filled (black) and some are empty (white). The plots show various distributions of points, some clustered, some spread out, and some with specific patterns like a diagonal or a square.
