

The grid-in response area is a 9x9 grid. The first three rows are for the answer choices, and the last six rows are for the student's response. The grid is divided into four quadrants by a vertical line and a horizontal line. The numbers 1-9 are placed in the grid, some inside circles and some outside. The symbols for plus, minus, multiply, divide, and equals are also present. The grid is used for the student to mark their answer for each question.
