

The image shows a 3x3 grid of dot plots. Each dot plot has a horizontal axis with numbers 1 through 9. The grid is divided into three rows and three columns by thick black lines. The top row contains three dot plots. The middle row contains three dot plots. The bottom row contains three dot plots. Each dot plot shows a distribution of dots representing data points. Some numbers are also written in the grid cells, possibly indicating the mean or median of the distribution.
