

A 10x10 grid with a complex black pattern of lines. The pattern consists of thick black lines forming a series of interconnected shapes and paths. The lines are arranged in a way that creates a maze-like structure, with some areas being completely filled and others being open. The pattern is symmetrical along the vertical axis. The lines are black and have a thickness of approximately 2 pixels. The grid is composed of 10 columns and 10 rows of squares. The pattern is formed by a series of horizontal and vertical line segments that connect to form a continuous, non-intersecting path. The path starts at the top left corner and ends at the bottom right corner, with various turns and loops along the way. The pattern is a single continuous line that forms a complex shape within the grid. The shape is composed of several rectangular blocks of different sizes, some of which are connected to each other. The overall effect is a complex, abstract geometric design.
