

A scatter plot on a 10x10 grid. The grid lines are light gray. There are 30 data points, each represented by a small open circle with a black outline. The points are distributed across the grid, with a higher density in the center and lower density towards the edges. The points are located at the following (column, row) coordinates (assuming (0,0) is the bottom-left corner):

Column	Row
1	1
2	2
3	1
3	3
