

A 10x10 grid with 30 black circles scattered across it. The circles are distributed in a way that suggests a random process, with some clusters and some empty spaces. The grid lines are thin and light gray, while the circles are solid black with thin outlines. The circles are of uniform size and are scattered across the grid, with some appearing near the edges and others in the center. The overall pattern is sparse and irregular, characteristic of a random distribution.
