

The image shows a 3x3 grid of a logic puzzle. Each cell contains a number and a colored dot. The grid is divided into four quadrants by a central cross. The numbers in each cell are as follows:

2	6	5	9	1
8	2		7	6
			2	3
1		8	2	
6	2	6		5
				7
9	7	3		
	4		7	

The colored dots are located in the following cells (row, column):

- Red: (1,1), (2,1), (3,1), (3,3)
- Green: (1,2), (2,2), (3,2)
- Blue: (1,3), (2,3), (3,3)
- Yellow: (1,4), (2,4), (3,4)

The lines connect the dots of the same color, forming paths that must be continuous and cannot cross. The paths are as follows:

- Red: (1,1) -> (2,1) -> (3,1) -> (3,3)
- Green: (1,2) -> (2,2) -> (3,2)
- Blue: (1,3) -> (2,3) -> (3,3)
- Yellow: (1,4) -> (2,4) -> (3,4)
